

Products in stock*

IMPREGO [Standard] & [Medigo]

➤ Low voltage dry-type impregnated transformers & autotransformers

* Minimum quantity of units in stock renewed at stock exit, availability not guaranteed.
Availability at factory of products in stock within 1 to 2 working days.

Tailored to your needs

Your requirements

Adapt your electrical installation to the required earthing system

Protect your equipment or installation from electrical disturbances

Limit the impact of disturbances and manage them

Modify the nominal voltage of your installation

Safeguard people and property

BCV Technologies solutions

A wide range of transformers and autotransformers

Standard solutions up to 1 250 kVA

Guaranteed availability with an important stock

A complete range of accessories

3-phase transformers

For which needs?

- >To change the earthing system
- >To isolate network disturbances
- >To change the voltage
- >To supply power and ensure safety of personnel or equipment maintenance
- >To limit the impact of disturbances and manage them

"Did you know that..."

Primary delta coupling removes order-3 harmonics."

Typical technical characteristics*

- Power : 8 to 400 kVA
- Voltage ratios : 400/400 V or 400/231 V
- Tapping points at +/- 5% on transformers from 31.5 to 400 kVA
- Triangle/star coupling with neutral
- Compliant with standards : IEC/EN 61558-2-4 or IEC/EN 60076-11
- Isolation and heating class : H
- Aluminium windings
- Max. ambient temperature : 40°C
- Frequency : 50/60 Hz
- Standard dry-type
- Tropicalized
- Electrostatic shield between the primary and the secondary connected to the earth
- Completely separate windings
- IP00 or IP21 – IK07 ; RAL9003
- Self-extinguishing ability (**F1 certif.**)
- Enclosure may be purchased later as an accessory

** Our vocation is to understand and adapt to your needs, consult us for any other characteristics : bcv-technologies@sgb-smit.group*

3-phase transformers for disturbed networks

For what needs?

>When non-linear loads generate harmonic **distortions of the current on the network** (examples: variable speed drives, computer equipment ...).

>This harmonic distortion is characterized by a value of **THDI** or **K factor**

>Our transformers are sized to operate on a network regardless of the K factor. You just need to consider the appropriate power derating. Below you will find applicable derating values for our standard transformers up to 400 kVA. **For any other need, consult us!**

" Did you know that...

Knowing your exact THDI allows optimizing the sizing of your transformer.

Self-extinguishing ability (**F1 certif.**)"

3-phase autotransformers

For which needs?

>To adapt the network voltage without isolating the installation from electrical disturbances

>To gain in size compared to a transformer with the same power

" Did you know that...

An autotransformer :

- Does not have a shield between the primary and the secondary
- Does not allow changing the earthing system
- Works both as a step-up and step-down transformer thanks to its reversible plugs."

Technical characteristics*

- Power : 10 to 400 kVA
- Voltage ratios : 231/400 V or 400/231 V
- Star/star coupling with neutral
- Reversible plugs
- Compliant with standards : IEC/EN 60076-11
- Isolation and heating class : H
- Max. ambient temperature : 40°C
- Frequency : 50/60 Hz
- Standard dry-type
- Tropicalized
- IP00 or IP21 – IK07 ; RAL9003
- Self-extinguishing ability (F1 certif.)
- Enclosure may be purchased later as an accessory

** Our vocation is to understand and adapt to your needs, consult us for any other characteristics : bcv-technologies@sgb-smit.group*

Single-phase transformers

For which needs?

- >To change the earthing system
- >To isolate from network disturbances
- >To change the voltage
- >To supply power and ensure safety of personnel or equipment maintenance
- >To limit the impact of disturbances and manage them

"Did you know that..."

Electrostatic or screening shield connected to the earth allows attenuating the effects of parasites and disturbances emitted by the source and by the receiver."

Technical characteristics*

- Power : 6.3 to 20 kVA
- Voltage ratios :
231/115 V or 231/231 V or 400/115 V or 400/231 V
- Tapping points at +/- 15 V
- Compliant with standards: IEC/EN 61558-2-4
- Isolation and heating class : H
- Max. ambient temperature : 40°C
- Isolation and heating class : H
- Frequency : 50/60 Hz
- Standard dry-type
- Tropicalized
- Electrostatic shield between the primary and the secondary connected to the earth
- Completely separate windings
- IP00 or IP21 – IK07; RAL9003
- Self-extinguishing ability (**F1 certif.**)
- Enclosure may be purchased later as an accessory

** Our vocation is to understand and adapt to your needs, consult us for any other characteristics : bcv-technologies@sgb-smit.group*

Healthcare transformers

For which needs?

>To **guarantee** service continuity and the quality of the electrical energy

>To **guarantee** the safety of users: personnel and patients under

"Did you know that...

The voltage in the secondary cannot exceed 250 V with no load."

Technical characteristics

- Dry-type single-phase and 3-phase LV/LV transformers compliant with IEC 61558-2-15
- Voltage ratio :
 - 230/115-230 V with load (single-phase transformers)
 - 400/230 V with load (3-phase transformers)
 - U_{max} in the secondary 250 V
- Frequency : 50/60 Hz
- Isolation level : 1.1 kV
- Isolation class : H
- Heating class : F
- Voltage drop < 5%
- Magnetizing current < 3%
- In-rush current < $12 \hat{I}_n$
- Leakage current between the enclosure and earth, and between the secondary and earth < 0,5 mA
- 1 earthing point
- 2 or 4 lifting points
- Equipped with heat protection (one thermostatic plug per column: alarm level at 160°C)
- Self-extinguishing ability (**F1 certif.**)
- **New ergonomics**: easy installation and maintenance
- Possibility of aluminum and copper connections on **IP2x screw clamp terminals**

Transformer without enclosure – IP00

Transformer with enclosure – IP21

Accessories

Thermostatic probes

- Temperature rise warning
- 6 probes (3 alarm level, 3 trip level) – see specific for healthcare transformers:
 - alarm level at 165°C (make contact)
 - trip level at 190°C (break contact)
- Contact characteristics :
 - I nominal : 2.5 A
 - U nominal : 250 V
 - Accuracy : $\pm 5^\circ\text{C}$

Nota : for other protection please contact us

Protection enclosure

IP21 – IK07
Available as standard or accessory (option).

Nota: for other protection index, please contact us.

Rollers

To allow moving the transformer.

Dampers

To reduce vibrations and noise.
